

Code your way to Tallinn

Hackathon Estonia
14.04. - 18.04.2026

Builds That Move

Program autonomous robots using computer vision, path planning, and sensor processing — turning code into real-world behavior.

Develop Creative Solutions

You'll work in international teams, develop sophisticated solutions, and prove them in a daily robot showdown, supported by experienced software engineers.

Code & Discover Tallinn

Between challenges, explore Tallinn — the Silicon Valley of the Baltics — and connect with fellow computer scientists in an unforgettable tech experience.
